SPECIFICATIONS

Frequency Range	UHF: 350~470MHz VHF: 136~174MHz
Channel Capacity	1024
Zone Capacity	64
Channels per Zone	256
Channel Spacing	12.5kHz/20kHz/25kHz
Operating Voltage	7.7V
Battery(Li-polymer)	2400mAh
Battery Life (5/5/90)	UHF:26 Hours VHF:25 Hours 22 Hours(GNSS) 21 Hours(GNSS
Frequency Stability	±0.5ppm
Antenna Impedance	50Ω
Dimensions (H x W x D)	132 x 55 x 29.5mm
Weight	290g
Display	0.91 inch OLED Display
BT	5.0 BLE+EDR

Professional DMR portable radio **HP705** NEXT GENERATION DIGITAL RADIO

NEW TECHNOLOGY, **NEW EXPERIENCE, NEW FUTURE**

As the leading supplier, Hytera has huge experience in R&D and manufacturing of professional digital radios. Having analyzed and extracted users' need, we perceive that it is not enough to improve the status: the radio needs to be more future ready.

Taking inspiration from the feedback received from our users, we are continuously envisioning and exploring better communication within an ecosystem of new standards, new technologies, new products and new applications across the innovation chain. The HP705 is our brand new professional digital radio, and represents the future on style and functions that refreshes the standards in digital radios, providing more efficient and more reliable communication with loud and clear audio, powerful battery, remarkable portability and ruggedness for ease of use across multiple environments and industries.

HIGHLIGHTS

THINNER AND LIGHTER

An optimized mechanical design and a compact lithium polymer battery are discreetly made to fit into the HP705's design, making the radio only 29.5mm in thickness and 290g in weight. This easy to carry and minimalist design benefits officers by allowing them to keep their focus on the critical mission at hand.

LONGER BATTERY LIFE

HP705 optimizes product design and technologies to reduce power consumption, meanwhile the latest in proven lithium polymer technology is used in the standard battery which is lighter and smaller than ever before.

The new technology achieves a shift life of 26 hours on high transmit power at duty cycle 5/5/90 so ensures a full day of delivering key information and calls.

FLEXIBLE WIRELESS CONNECTION

HP705 supports built-in BT 5.0 for wireless connections. The advantage of BT 5.0 is low power consumption, rapid transmission, supports multiple devices and more rich data applications such as BT earpiece, BT Patrol, BT positioning.

b LOUDER AND CLEARER AUDIO

that can help users to hear clear sounds even in a noisy environment. Water-porting technology is also used to drain out any water that gets into the speaker cavity, ensuring the audio clarity is maintained in case of water.

decrease 30dB background noise and howling. No matter what noise environment the calling party is in, it ensures that the called party hears a clear sound.

ENHANCED COVERAGE

The HP705 extends the operational range and improves the talk range through high receiver sensitivity and high transmit power, stretching communications into areas where it simply was not possible before. This enhanced coverage improves the user safety and reduces network cost as much as possible.

HIGHER LEVEL OF RUGGEDNESS

IP68 rated, impervious to water jets and submersible to a depth of 2 meters for 4 hours, and also resilient to 2-meter drops onto concrete. No matter where the mission drives the user, the HP705 is the partner to count on, because it can stand up to the toughest environments.
